

VIRASOFT'S IMAGE MANAGEMENT SYSTEM (IMS)

Virasoft's Image Management System (IMS), VIRACENTER is a CE-IVD certified, web-based application that offers a secure digital storage and efficient slide management solution for all whole slide scanner file formats.

Virasoft's IMS utilizes advanced algorithms to analyze data from immunohistochemistry studies, resulting in seamless workflows, optimal performance, accurate results, and reduced turnaround times. By opting for Virasoft's IMS products, laboratories access the exclusive power of highly accurate and well-trained algorithms.

Virasoft Decision Support System

Key Features: How Virasoftware IMS Reduces Complexity and Enhances Workflow Efficiency

- Efficiency in workflow with the user-friendly Image Management System (IMS)
- Universal compatibility with all whole slide scanner file formats
- Easy, anytime, anywhere access to cases and slides
- Secure digital archiving for long-term storage and retrieval
- Creating collections and sharing based on study needs
- Collaborative consultations with external experts
- Automated case creation
- Case files containing images, video, and voice recordings.
- Monitoring disk capacity and storage disk usage with statistics screen
- Easy integration with Virasoftware workflow solutions
- De-identification to anonymize cases for consulting

Virasoftware's Impact on Cancer Diagnosis and Research

Founded in 2015, Virasoftware specializes in services that accelerate and digitalize cancer diagnosis. Virasoftware is committed to developing AI-based decision support algorithms, workflow solutions, telepathology platforms, and pathology education systems for evolving digital pathology needs.
